Levi P. Morton's Sensible Remarks to Visiting Clubs.

Poughkeepsie (N. Y.), October 18th.—There was an immense demonstration at Rhineeliff to-night, the occasion being a visit of various Republican clubs to Mr. Morton. On arriving at Mr. Morton's residence the clubs were massed on the lawn on the north side of the house. George Esselstein, of Rhinebeck, as Chairman, welcomed the clubs and presented them to Mr. Morton, who spoke as follows:

"Mr. Esselstein, friends and neighbors: Hluminated demonstrations of this magnitude are of rare occurrence in quiet country towns, and the surprise of the people of Rhinebeck can, I think, only be compared to that of the red men of the forest when the Pilgrim Fathers landed on Plymouth Rock, or when Hendrick Hudson's boat made its first trip up the Hudson river. However, I have great pleasure in greeting you with a cordial welcome, and beg to assure you of my grateful appreciation of the honor conferred upon me by your visit this evening. Beyond welcoming you here, in the best terms at my command, I do not see that there is much to be said. You are all Republicans, and no arguments are therefore needed either to convert you to those principles or to strengthen a wavering faith in them, and it so happens that within our party there are no questions upon which Republicans differ. There is nothing in our platform that calls for guarded explanations or diplomatic excuses, and there are neither party cliques, nor sections, nor factions. Therefore, we have no politics to talk about this evening. We can at least felicitate ourselves and others upon the harmony which pervades the Republican party, and the element of strength which such an unity of the sentiment and purpose betokens. You probab'y know that the Republicans of every other Visiting Clubs.

From early morning rain fell steadily, and by 11:30 A. M., when the speaking at the Tabernacle began, the crowd had dwindled to less than three thousand.

Ira J. Chase, candidate for Lieutenant-Governor of Indiana, Colonel Law, of Atlanta, Ga., and others entertained the crowd until Hon. Robert T. Lincoln, of Chicago, was announced. Shortly after 1 o'clock Mr. Lincoln was introduced as "the eldest son of our martyred President, Abraham Lincoln," and was greeted with generous applause. Thurman Addresses a Large Crowd of

It is estimated that 15,00 people were in town during the day.
Judge Thurman began by complimenting the crowd on its size, and said it was a healthy indication of how Indiana would go in November. If the Indiana Democrats did their duty Grover Cleveland would be the next President. He then proceeded to discuss the tariif and the question of the surplus, following the line of argument pursued last night at Fort Wayne. His audience gave the closest attention, frequently applauding and showing interest in and a keen appreciation of the points made throughout the speech.

At the conclusion of his speech, which lasted thirty-five minutes, Judge Thurman was driven to the depot and rested quietly in his private car. A large crowd was on hand to see him, and he came out three times to chat with them. Judge Thurman left for Indianapolis at 3:30 P. M.

INDIANAPOLIS, October 18th.—Judge Thurman and party arrived here a few minutes before 9 o'clock. CHAMBERSBURG (Pa.), October 18th.—A fatal wreck occurred on the Cumberland Valley Railroad, near Shippensburg, this morning. Trains Nos. 14 and 9 collided at a sharp curve in the road, telescoping the cars and completely demolishing the engines. The officials of the road here are very reticent in the matter, and retuse to state anything of the cause. From trainmen the following particulars are learned:

Both trains were late, and the conductor of No. 9, coming south, received orders at Newville to run to Shippensburg and pass No. 14. The miles met the incoming train.

The engineer of No. 14 saw the smoke of the other train around the curve, and shut off steam and applied the air-brakes, but before he could stop both trains

New Haven (Conn.), Cetober 18th.—Bryant Lynn, of this city, and Xavier Oriaiski, of New York, had a savage broadsword fight this afternoon. The duel was so fierce that the police ended it after the seventeenth bout, and both men swore to kill each other. Lynn was severely wounded, but scored 11 points to Orlafski's 7. A RED-HOT COMBAT.

NEW HAVEN, Cotober 18th.—The broadsword contest this afternoon between Bryant Lynn, of this city, a member of the Connecticut National Guard, and Navier Orlafski, of the German Black Hussars, developed so much bad blood that the police interfered and stopped the fight a ter the second attack. When Lynn first rode up and saluted Orlafski, the latter retaliated by giving him a bad cut on the wrist. This made the crowd very indignant. The New Haven man had the better of the fight, and the secre stood—Lynn 8 points, Crlafki six roints When the men came together in the second

bout, Lynn greatly surprised the German by un-horsing him. At this the latter became enraged, and rushing up to Lynn struck him across the sword-arm. The crowd then made a break for Orlafski, and the police had a lively time to

keep them off.

When order was partially restored the Chief of Police stopped the fight. The referee decided the score to be: Lynn 9 points, Orlafski 5 points, and ordered the fight continued at some TO-MORROW.

PUBLIC LANDS.

Copyright, 1888, by the California Associated Press.

WASHINGTON, October 18th.-The report of the Commissioner of the Land Office, of which a brief synopsis was given a few days ago, has been published. It shows that the final entries pending in the General Land Office for Califor-nia on June 39, 1888, number 14,515. The numper of original entries pending at that date for The report quotes liberally from the report of Surveyor-General Hammond as to the necessity for increased appropriations for surveying public lands in California. The Commissioner says that unserviceable lands in California consist mainly of mountainous lands heavily covered with timber and dense undergrowth. While, under the existing regulation, applications for the survey of forests or heavily-timbered lands are not entertained, and therefore not in question, there still remain large tracts of mountain lands which are covered with a dense undergrowth known as "chemisal," or "chaparral," and almost impenetrable in localities. In California these lands are in demand, being especially adapted to grape culture, and many applications for surveys were presented to the United States Surveyor General, but owing to the insufficient mileage allowed by law, but few bids for surveys were submitted, and in the majority of instances no responses were received. Mr. McKenna has been more than faithful-he has delighted in duty doing. To do as he was sworn was not to him a task, but a pride. THE BOND JUGGLE.

Mr. Secretary Fairchild rushes to the aid of his chief, Mr. Cleveland, who in desperate strait appeals to his Cabinet; and Mr. Fairchild accordingly takes up the heavy end of the surplus log. He has the assurance to tell an intelligent people that i was wise to put out millions from the surplus to be manipulated by the banks without paying anything for the use of the money. He holds that in no other way could the Government put the money into circulation. But there are about \$1,000,-000,000 of debt represented by bonds of the United States, which in three and in ninethey bear interest. Now Mr. Fairchild the men (strikers) ought to return to their knows that to huv in these hands at a preknows that to buy in these bonds at a premium less than the interest, would put the enough, and that one dollar per day was surplus into the channels of trade and save enough for any workingman; that he himmium less than the interest, would put the a large percentage of the interest to the Government. Suppose a \$100 bond when due would, principal and interest, be worth \$176, and can now be secured for \$128 to \$132, is it not economy to pay the premium, save the difference and at the same time restore to circulation the stored coin and dissipate the surplus mist?

AN "IF" PROGRAMME.

Mr. Congressman Mills, the author of the Democratic measure to knife American industries, knows precisely what the drift and the aim of his party is, and he has the courage to declare it, but with many an "if." Hear him, as he spoke September 25th at St. Louis. The italics represent the eloquent emphasis of the Texan orator: eloquent emphasis of the Texan orator:

If Grover Cleveland is re-elected President of
the United States; if another Democratic House
of Representatives is chosen, and if we can get
our Republican friends out of the other end of
the Capitol, and get Democrats in place of them,
then we will passe tariff bill that puts raw materials all on the free list, and then we will put
our own intelligent and skillful and productive
labor in this country upon a plane of equality
with the laborers of all other countries.

This pice little Democratic programme

This nice little Democratic programme means then just this: that if it can be accomplished the "intelligent, skillful and productive" laborers of this country must, in the matter of wages and condition of living, come down to the level of the ill-fed. ill-paid, monarchical-cowed and aristocratic-ridden peasant laborers of Europe. It is a pleasant prospect, to be sure; but it is the unquestionable scheme of his party, as expounded by the great Democratic Apostle of Free Trade.

RIGHT WORDS FROM THE RIGHT MAN. General Harrison, on presenting

I know of few measures of greater importance than this. I noticed recently in one of the Chicago papers the results of some inquiry upon this subject, and it seemed to indicate that vast tracts of our domain, not simply the public domain on the frontier, but in some of our newer States, are passing into the hands of wealthy foreigners. It seems that the land reforms in Ireland, and the movement in England in favor of the reduction of large estates and the dis-Ireland, and the movement in England in favor of the reduction of large estates and the distribution of the lands among persons who will cultivate them for their own use, are disturbing the investments of some Englishmen, and that some of them are looking to this country for the acquisition of vast tracts of land which may be held by them and let out to tenants, out of the rents of which they may live abroad. I think this evil requires early attention, and that Congress should, by law, restrain the acquisition of such tracts by aliens. Our policy should be small farms, worked by the men who own them.

FIRST CLASS IN IDIOCY.

The San Francisco Examiner astonishes the natives by utterance of this marvelous idea, to wit: Since the passage of the Scott bill the Republicans have no hope to make political capital out of the anti-Chinese sentiment; therefore, they have now resolved to pronounce in favor of the pro-Chinese sentiment-the repeal of the Restriction Acts, and the opening up of unrestrained Chinese immigration.

It is with profoundest pity for mental decay and intellectual wreckage, that we suggest to the San Francisco Lunacy Commission to take the editor of the Examiner in charge and put the unfortunate where no harm come to the sane by reason of his mental collapse.

It fluential newspapers like the New York This affidavit is very long. It sets forth: 1. That they have read the Gould and Schwartz circulars. 2. General Harrison did not organize,

arm or drill the company.
3. He did not march with it to the depot, or towards it, or towards the strikers, threatering to start the train by force.
4. The Governor did not "head him off." The Mayor did not "stand by and resist General Harrison." General Harrison did not say to his men, "We'll shoot the dogs, anyhow; hanging is too good for them," or, any statements that can be possibly tortured into any such meaning. 5. All the statements in the letters and circulars referred to concerning the com-pany are "maliciously false."

6. Governor Williams issued his proclamation July 26, 1877. Next day the com-pany formed, and all the troops, including , marched, not to the depot, but to the United States Arsenal, more than a mile away and there remained until disbanded. 7. By request of Governor Williams, regular troops were sent from the regular army and arrived at the arsenal August 28th, and on the 29th the militia returned to the city and were mustered out. 8. When the order came to muster out, General Harrison came to the company charges, and saying that the words were and ordered the men, drawn up in line, to unload their weapons. They did so, and General Harrison then said to them in explanation: "Let us remember that our mission is to prevent violence, not to do violence. It would be an infinite pity if, on the march or after we reach the city, one of these arms should, by accident, even, become discharged, and some innocent person be injured. I am still of the firm conviction that nothing more than the mere fact of our military organization will be required to secure the peace."

9. The suggestions of General Harrison about unloading was adopted by General Macauley, in command of all the troops, and was then made a general order. 10. The troops then marched, not to the depot, but to the front of the Postoffice and stacked arms. General Macauley rode, unarmed, to the depot, and among the strikers, to see if there were any signs of rioting. He soon returned, reported peace and order, and the troops were then and there dis

11. General Harrison's pay, and that of others of his company, amounted to \$211 22, About that time a circular was issued by and the money was donated to the indianapolis Light Infantry, and paid ver to Local Assembly 263, Knights of Labor, at Frank L. Bixby, treasurer of said company. Canisteo, N. Y., containing a letter by THE KNIGHTS OF LABOR REPUDIATE GOULD. Now recall these facts. Gould addressed a circular letter dated September 10, 1888, to Local Assembly 263, Knights of Labor, and a cold lunch; that their familes seldom at a warm meal; that the food was usually coarse; that sowbelly was the bor, and signed the letter as Secretary of the same. The Indianapolis News put lished the letter, and the very next day Hon. James A. Wildman and Charles P. Watson called on William Klinesmith, a hatter, Master Workman of Assembly 106. who then and there repudiated the Gould letter, declaring he had never seen it before, that a copy of it had never been laid before the Assembly, and that the seal was used "without authority." Messrs. Wild-man and Watson on the 5th of October, 1888, swore to an affidavit setting forth these facts, and adding that Mr. Klinesmith said to them that he would bring the matter before the Assembly at its next meeting

the third Friday in October. GOULD'S CONFESSION. Before Gould had been employed to work for the Democratic Committee he made statements that prove him to be a concontemptible liar, as the following affidavit

CAVANAUGH VS. CASSELMAN. Suit to Recover Damages For an Alleged

Violated Contract. B. W. Cavanaugh, Jr., by his attorney, Grove L. Johnson, yesterday commenced an action in the Superior Court against Ezra Casselman, for \$3,260, for an alleged violation of a contract. The plaintiff alleges that on the 16th of May, 1888, he entered into a contract with defendan to purchase a tract of seventy acres of land, situated on the Riverside road, about one mile from Sacramento, and bounded as follows: On the north by lands of W. A. Gamble, on the east by lands of Mr. S. Crothers, on the south by lands of L. W. Liucoln, B. W. Cavanaugh and Antone Cook, and on the west by the Sacramento river, together with all the improvements thereon, hereditaments and appurtenances; also, all the live stock and all the furniture upon the premises, except the blankets and wearing apparel of Casselman and wife. The growing crops were also excepted. The price to be paid under the provisions of the contract was \$24,000—\$1,000 down on the signing of the agreement, \$8,000 on October 15th, a mortgage to be given by plaintiff to defendant, bearing interest at the rate of 5 per cent, per annum, to insure the payment at the end of five years of the remaining \$15,000.

Plaintiff further alleges that it was stipulated in the contract that when the \$8,000 was paid, and the mortgage executed, the defendant should execute and deliver a good and sufficient deed to the real estate, improvements, etc.

Plaintiff recites that the contract was duly acknowledged and recorded; that he fully complied with its requirements: that on the 15th day of October, 1888, he paid the \$8,000 and made the mortgage for \$15,000, and defendant executed a deed of what purported to be the land described in the contract. Plaintiff alleges, however, that the deed excepted from its operations a pieces of land \$0 by 100 feet, with a house thereon, which land and house were included within the provisions of the contract, and which house and land, plaintiff is informed and believes, has been conveyed to a third party. The value of the house and land is estimated at \$1,000. It is alleged that defendant, after making the contract, disposed of a colt worth \$250, four tons of hay, valued at \$100; that he tore down and destroyed fences valued at \$200; that he sold hop peles worth \$100; that he turned sheep and other stock into the orchard, and to purchase a tract of seventy acres of land, situated on the Riverside road, about one mile

THE GREAT FLUME.

WORLD AT SAN DIEGO.

Carle & Croly, of Sacramento, the Contractors-Amount of Timber

become for the south.

San Diego has one of the best harbors on the coast, but the country, like all in the southern part of the State, is dry and arid, and water is only obtainable by going to the mountains, some thirty-five or lorly miles distant.

A company was organized and incorporated to bring water from the mountain streams to San Diego. It was called the San Diego Flume part of the State, is dry and arid, and water is part of the State, is dry and arid, and water is only obtainable by going to the mountains, some thirty-five or lorly miles distant.

A company was organized and incorporated to bring water from the mountain streams to San Diego. It was called the San Diego Flume Company. Carle, Croly & Abernathy, of this city, were the sub contractors for the work, and their contract called for an expenditure of over \$550.000.

three quarter miles, and the thirty-fourth mile is now completed.

"Yesterday alternoon a reporter of the Union obtained from Mr. Croly some interesting facts concerning the construction of the flume. The work of tunneling and grading was done by the San Dieso Flume Company. The contract for furnishing the materials and completing the flume was awarded to the firm of Moore & Smith, of San Francisco. Subsequently, Messrs. Carle, Croly & Abernethy became sub-contractors for hauling out all the lumber and doing the entire work of construction. All the lumber has been delivered by Moore & Smith at this port. The first shipload arrived on June 7th of last year, and was brought by the brig Deacon, a vessel owned by Moore & Smith. The pine lumber used in the flume was brought from Port Discovery. The redwood came from Humboldt and vicinity, in Mendocino county. Redwood was used exclusively in the box of the flume. It was strictly clear selected redwood, without knots or sap.

TRANSPORTING THE LUMBER. "The work of the contractors, Carle, Croly & Abernethy, began early in June of last year. O June 27th the first load of lumber was haule out. An idea of the gigantic character of the work that has since been done can be gained be a since been done can be gained by

work.

"Mr. Carle estimated the amount of lumber used in the flume at 9,000,000 feet. This is a very conservative estimate, and in all probability considerable more was used. The vastness ity, considerable more was used. The vastness of this amount of lumber can better be impressed on the mind of the reader by some comparative statements. Had this lumber been all loaded on wagons at one time it would have required 3,000 wagons and 25,000 horses to haul it. The string of teams, if drawn into line one after the other would make a procession over fitty miles. string of teams, if drawn into line one after the other, would make a procession over fitty miles long. The amount of lumber used in the construction of the flume would be sufficient to erect over two hundred large two-story residences and would load nearly forty large ships. "A tree that will yield 1,000 feet of lumber is a large one, and yet it would require 9,000 of such trees to furnish as much lumber as was consumed in building the flume. This number of trees, as can readily be seen, would make quire a forest.

OVER THREE HUNDRED TRESTLES. over these flumes there are 315 restles, the longest of which is 1,700 feet in length and 85 feet high. Its construction required 250,000 feet of lumber. This is the los Cochos trestle. The Sweetwater trestle is 1,200 feet long and 85 feet high. The main timbe 8 used in these trestles are 10x10 and ax3. They were not together on the ground and raised to used in these tresties are 10x10 and 8x5. They were put together on the ground and raised to their position by horse-power.

"There are eight tunnels in the course of the flume, the longest of which is 2,100 feet in length. The tunnels are 6x6 feet in size, with convex naped roofing.
"Each mile of the flume required, on an

verage, 250,000 feet of lumber for its construc-on, and the redwood used in the box is all two nehes thick.

"The San Diego firme is pronounced by men experienced in such me is pronounced by men sysperienced in such enterpris s to be the largest ever built in the world. So stupendous was the undertaking that at its conception many deplared that it could not be built. Every obstatle has now been overcome, however, and by the 2d or 3d of September the last spike in the flume will be driven. The water will then be brought to the reservoir, about ten miles from San Diego, from which point it is proposed to pipe the water to the city.
"In regard to the mechanical work done in

"In regard to the mechanical work done in the construction of the flume, all who have examined it declare that it is first-class in every particular. Engineers have carefully fixed the grade every mile, in order, as near as possible, to insure persection in that important particular. The flume has a uniform grade of four and seven-tenths feet to the mile.

"An idea of the difficulties that have been overcome in the construction of the flume may be gained from the consideration of the fact that much of the lumber had to be drawn 700 and 800 feet up the sides of steep and rocky mountains. The lumber was loaded on cars that ran on a portable track. The cars were attached to a heavy wire cable. The motive power was furnished by a portable engine.

"The flume is now completed, and as the work of laying the pipes from the reservoir is comparatively an easy one, it will not be long before the water from the great flume will be flowing into our city."

Another San Diego paper, in speaking of the ame matter, says:
"A meeting of the Directors of the San Diego
Flume Company was held yesterday and a final
settlement made with the contractors, who have pushed the work forward with entire satisfac

Mills & Co. yester SACRAMENTO PUBLISHING COMPANY, THE GREATEST FLUME IN THE day received a telegram, in cipher, from the Farmers' and Merchants' Bank of Los Angeles to pay \$500 to O. H. Bliss. An hour or two after ward a dark, tall and rather good-looking man, about 35 years of age, wearing a luxuriant brown

mustache, entered the bank and asked for the Contractors—Amount of Timber

"Give us good soil and plenty of pure water, and as can stand the assaults of the world."

That expression was made use of in a recent fruit-growers' meeting at Pasadena, and its truth is apparent to all. Plenty of water, and a soil unexcelled, is what we have in California, but they do not have it in the southern part of the State. The boom in Southern California two years ago made the people, especially in the neighborhood of Saa Diego, look for a water supply. They had one of the finest harbors on the morthern part of the State, San Diego must become for the south.

to bring water from the mountain streams to San Diego. It was called the San Diego Flume Company. Carle, Croly & Abernathy, of this city, were the sub contractors for the work, and their contract called for an expenditure of over \$5.50,00.

Carle & Croly are well known citizens of Sacramento, who have contracted for years in this city, and who have always performed their work according to contract. It was reported some time since that this contract had embarrassed them financially, but this is a mistake, for they not only fulfilled all their requirements, but came out several thousand ahead. It is a credit to the firm and to Sacramento that the largest work of the kind in the world could be accomp ished by them in so short a space of time and so thoroughly.

In this connection the following from a San Diego paper will prove of interest:

"Yesterday marked an important period in the progress of the construction of the great San Diego flume. The last load of humber for the flume left the yard of the contractors. Mess rs. Carle, Croly & Abernethy, on the corner of F and Arctic streets. The total length of the flume, when finished, will be thirty-five and three quarter miles, and the thirty-fourth mile is now completed.

"Yesterday afternoon a reporter of the Union obtained from. Mr. Croly some interesting force."

The bank officials telegraphed at once to the bank in Los Angeles, to ascertain if the dispatch really came from them, as it is possible that the company of the money to be sent here. When searched at the station house there was found and three quarter miles, and the thirty-fourth mile is now completed.

"Yesterday afternoon a reporter of the Union obtained from. Mr. Croly some interesting factor." The bank officials telegraphed at once to the bank in Los Angeles, to ascertain if the dispatch really came from them, as it is possible that some confederate of the man arrested here has gotten possession of the cipher used by the banks, and that the telegram was also a fraud. No reply has yet been received. Mr. Miller does not think it likely, however, that any one has got possession of their cipher.

Among the trade displays was a large logcabin, full of occupants of a printing-office, set-

Mead's fruit-packing establishment was repesented by half a dozen wagons in which were ousy workers packing raisins, a wine-press crushing grapes, a log cabin composed of raisin boxes, a blacksmith shop, the Barton Vineyard display, Madera Lumber Company, a wagon of grapes, several wagons of wool, brick masons laying bricks, a steam sawmill, North's Vine-yard and many other raisin-packers, and sev-eral carriages containing ladies representing the colonies and States.

The line was full of fine and very suggestive motioes. Colored lights blazed all along the line, and the bright new city of Fresno presentmottoes: Colored lights blazed all along the line, and the bright new city of Fresno presented a gala-day appearance, and unbounded enthusiasm prevailed all over the town.

At 8:40 three meetings were held in town. One was on J street, in front of the Grand Central, and addressed by Judge Haynes, of Los Angeles, who spoke eloquently to a perfect sea of people for au hour and a half.

He was followed by Dr. Rowell and H. T. Payne. Another meeting as large as the firstmentioned, was held on Mariposa street and addressed by Judge Smith of Los Angeles, a veteran campaigner, who held his audience for two hours, and the third was held in front of of the Hughes House and addressed eloquently by Mr. C. D. Shirtliff of San Francisco.

The streets of the town for a block around the stands were literally packed with anxious literature. e stands were literally packed with anxiou listeners.

The people of Fresno were in earnest in their endeavor to protect their interests of wool and raisins, and many old-time Democrats were pointed out in the ranks of the grand procession. It was an outpouring such as Fresno never saw before, and would have done credit to a city four times as large.

Dr. Chester Rowell, who has just returned from a trip around the world, addressed the people at different times from all three stands, exhibiting a suit of clothes purchased in England at \$22, which the merchants of Fresno of fered to duplicate in American-made goods for

He Says That All England Hopes For Cleveland's Election. [Copyright, 1888, by the California Associated Press. NEW YORK, October 18th -Senator Stanford.

New York, October 18th —Senator Stanford, who arrived to-day, said in an interview with your correspondent this evening:

"I have come home to vote and work for Harrison and Morton. I have been in Europe about four months. I undertook the journey on the advice of my physician, Dr. Loomis. I was somewhat troubled with vertigo, but adopted dieting. With this and a change of scene and air I am now in excellent health. I had many opportunities for observing carefully the people of England, especially the working people. They are obliged to live frugally, even absteminously. Their provisions on the whole are dearer than those of working people here, and their wages much less. They do not know the comforts our people here have. The English are paying unusual attention to our Presidential campaign. Every Englishman is for Cleveland. He is the unanimous exception. Cleveland. He choice of the lof the United States.

free trade notions. Of course England is a great producing country. With her system of free trade, labor is cheaper there than here. Free trade for the United States would make this country a great English market. I shall do what I can to prevent any such condition of affairs from coming to pass. I am quite able for active work. No matter what is said to the contrary, you may depend upon it, the majority of the Pacific coast voters are for Harrison and Morton. The Prohibition movement and American movement may cause some deflection but In the Pacine coast voters are for Harrison and Morton. Marriage of an English Gentleman to Sioux Indian Belle. STANDING ROCK AGENCY (Dakota), October 8th.—The staid people of the Agency are con-iderably shaken by a sensation of the most ively character. Last week a small party of English gentlemen. who were souring this section of the country on a hunting and pleasure expedition, lost their bearings and wandered to the Agency, where the Indians gave them the necessary in-formation in regard to their route. In the comformation in regard to their route. In the com-pany was Henry Ashburton, a wealthy young man of Leeds, England.

While preparing dinner in their tent the first day of their arrival, a daughter of one of the leading chiefs entered, approached the aston-ished young Briton, threw her arms around his neck and repeatedly covered his face with pas-sionate kisses. The maiden was ravishingly lovely, with delicately rounded limbs and long, glossy dark hair.

lovely, with delicately rounded limbs and long, glossy dark hair.

Though considerably surprised, the young man made no attempt to interfere with the glirl's strange behavior, for he seemed to be well pleased with the performance, and when she ceased showering kisses, he in turn caught her up in his arms with an affectionate hug and kiss. Their acquaintance riponed into love kiss. kiss. Their acquaintance ripened into love, and the wedding occurred yesterday.

THE "PROTEAN."

Messrs. Fishe, Clark & Flagg, manufacturers of the finest Men's Neckwear made in America, have sent us their latest novelty, the "Protean."

This Scarf is a large shape, particularly suitable for winter wear. By changing the position of the scarf-pin, it may be worn in three different ways, thus affording a variety of styles.

Although the Protean is entirely new, its shapes novel and attractive, yet, to our mind, the chief charm is in the silks and patterns, which are the perfection of fine designing and weaving.

"OVER-PARTICULAR."

The bulk of Boys' Clothing runs a scrub race. The goal is to make what will sell at the highest prices and cost the least to produce.

In our business we learn of some curious things about boys' clothing, and the slipshod manner in which it is sometimes put together. The fact is, few dealers anywhere pay as much

attention to the quality of materials and the kind of work put in goods of this kind as we do. Our standard of excellence is now so high that only the very best manufacturers-and they are

not many-are able to supply goods which we will accept. Many makers have told us that we are over-particular. If we are, it is a virtue rather than a fault. It is this being "over-particular," where other merchants are "not particular," that has centered here such a great trade.

Regular trains will be running by the first of next week. H. S. Briggs, a safe manufacturer of Rochester, N. Y., is missing. He is said to have committed forgeries to the extent of \$15,000. The City of New York arrived from Liverpool resterday in six days and twelve hours. She is xpected to yet make the trip in a little over Officer Pete Poull, while attempting to arrest a man named Murphy at Moorhead, Mich., on Wednesday, was shot and instantly killed by the latter.

Hettie Fellows, aged 15 years, committed suicide by shooting at Carson, Nevada, on Wednesday. No cause is known for the act, except that she had been reproved by her parents. The Southern Pacific Company is experiment ing on the Southern divisions of its system with Mexican coal, which if satisfactory will result in a largely increased consumption of that article

The body of J. Murphy, a railroad employe was found in a coal house at Holbrook, A. T. yesterday, with his throat cut from ear to ear A small pocket knife was found near the body t is not known whether it is a case of suicid

Boys vs. Chinamen. Manager Browne, of the State Board of Trade, states that the boys sent into the country from this city to pick fruit have given general satisfaction to their employers. Those who at first would not listen to the proposition of substituting white for 'hinese labor in their orchards auting white for a hinese labor in their orchards and vineyards, are now enthusiastic over the scheme. As the fruit season is now about over, the large majority of the boys have returned to their homes with a few dollars in their pockets and in the best of health. But many are still in the country and will remain there, as the fruit-growers will employ them in preference to Chinese in the future, as they feel pleased to see among the boys so much thrift and willingness to work for the wages paid.—S. In Brief, and to the Point. Dyspepsia is dreadful. Disordered liver misery. Indigestion is a foe to good na-

The human digestive apparatus is one of the most complicated and wonderful things in existence. It is easily put out of order. Greasy food, tough food, sloppy food, bad cookery, mental worry, late hours, irregular habits, and many other things which ought not to be, have made the American people a nation of dyspeptics.

But Green's August Flower has done a wonderful work in reforming this sad business and making the American people so healthy that they can enjoy their meals and be happy.

Remember: No happiness without health.
But Green's August Flower brings health

and happiness to the dyspeptic. Ask your
